Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by
Jacobs (3998570). Jacobs discloses an air conditioning compressor 10 comprising a
compression cylinder 16 to receive fluid from suction/inlet port 78, and to urge the fluid
out of a discharge/outlet port 82; a movable member/piston 78 within the compression
cylinder 16 for pressing the fluid within the cylinder 16 and urging it out of the
discharge/outlet port 82; and a variable clearance volume chamber 70 between in fluid
communication with the compression cylinder 16, the chamber 70 having selectively
variable volume for containing a correspondingly variable amount of the fluid, a bellows
106 controls to have a selective variable-volume according to ambient temperature. See
Fig. 1-2 and column 3, line 45 to column 4, line 27.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 6-10 and 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacobs in view of Mei et al. Jacobs discloses the invention substantially as claimed as stated above including a gas cooler (inherent), an evaporator (inherent) and an expansion device (inherent). However, Jacobs does not disclose a water heater. Mei et al., teach the use of a water heater 110, a gas cooler/condenser 166, in a heat pump water heater system for the purpose of heating water by exchanging heat between refrigerant and water See Fig. 4. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the air conditioning compressor of Jacobs in view of Mei et al., such that a water heater could be provided in order to heat the water.

Allowable Subject Matter

Claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
